DETAILED ACTION

Election/Restrictions

Restriction to one of following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a vehicle mirror with a light, classified in class 362, subclass 494.
- II. Claims 19-26, drawn to a vehicle mirror with an intercom system, classified in class 340, subclass 438.
- III. Claims 27-29, drawn to a control system for adjustable interior components, classified in class 307, subclass 9.1.

The inventions are distinct each from the other because of the following reasons:

Inventions of groups I, II, III are independent (i.e. no disclosed relation therebetween)

These inventions are distinct if it can be shown as three different combinations, not disclosed as capable of use together, having different modes of operation, different functions or different effects (MPEP 806.04). In the instant case:

- Group I is separate and distinct from Group II because Group II is a combination of vehicle mirror and an intercom system and do not require a light with vehicle mirror.
- Group I is separate and distinct from Group III because Group III is a combination of vehicle mirror and control system for adjustable interior components of the vehicle and do not require a light with vehicle mirror.

Art Unit: 2875

- Group II is separate and distinct from Group III because Group III is a combination of vehicle mirror and control system for adjustable interior components of the vehicle and do not require the intercom system with vehicle mirror.

Because these inventions are distinct for the reason given above and the search required for Group I is not required for Group II and Group III, restriction for examination purposes as indicated is proper.
